

Cost-effective, eco-friendly payment procedure

Does your business office handle a large number of invoices from Telia? Then our Telia EDI Invoice service could represent real savings for you. Standardized electronic invoices will improve your cash flow, which means lower administrative costs. And at the same time you will be helping the environment.

Fast, secure handling

With Telia EDI Invoice, we deliver the periodic invoices electronically – directly into your business system. Standardized content allows extensive computerization, minimizing the need for manual handling. By optimizing administrative procedures for your business, you will have an excellent opportunity to cut costs.

The invoices will be instantly accessible to all involved persons in the company, from project managers to business administrators. You can switch to Telia EDI Invoice for almost all of our invoiced sales of subscriptions for mobile telecom, fixed telecom, data services and also invoices from TeliaSonera Finans.

Compliance with established standards

Telia EDI Invoice is designed in compliance with EANCOM/EDI's application of UN/EDIFACT. SFTI Svefaktura telephony/ XML. Telia's EDI invoice provides the same information content as the paper invoice.

Choose your communications solution

You can use the following communications solutions for Telia EDI Invoice:

- ▶ Ftp
- ▶ Sftp
- ▶ Http
- ▶ Https
- ▶ EDI-INT/AS2
- ▶ ebMS 2.0 for HTTP

Tested implementation procedures

Once you decide to implement Telia EDI Invoice, the first step will be to take inventory of which subscriptions will be invoiced via the service. Your employees and Telia carry out this task together.

A 35-character field for optional information at invoice level allows you to document items such as cost center, manager section, or accounts.

During an introductory test period we deliver Telia EDI Invoice parallel to the traditional paper invoices. Once the tests are over and you sign an agreement for the service we switch completely to EDI invoicing. All handling of paper invoices will end at that time.

Prerequisite

To be able to receive Telia's electronic invoice your company must have the appropriate technical platform or refer to a third party.

Would you like to know more about Telia EDI Invoice or place an order? Submit your information online at www.telia.se/foretagskontakt and a sales associate will soon contact you. You can also call us at tel. 90 400.
