

All prices are listed excluding VAT. Valid from October 27, 2009, with reservation for price changes.

With Telia Reflex you get fast answers to all your questions about your company's total telecommunications. The license package in the price list is based on the number of authorities per company registration number. You subscribe to a license package with the number of authorities your firm needs. The authorities are then set for company or Group authorities, based on each user's need for information.

You only pay for those company registration numbers that have registered users.

Telia Reflex Traffic Module

This module includes the Analysis and Invoices functions.

The module provides added value to our traffic agreement customers and is free of charge, irrespective of number of authorities.

Telia Reflex Module Subscription
