

Make a call to the virtual meeting room (VMR) with WebRTC

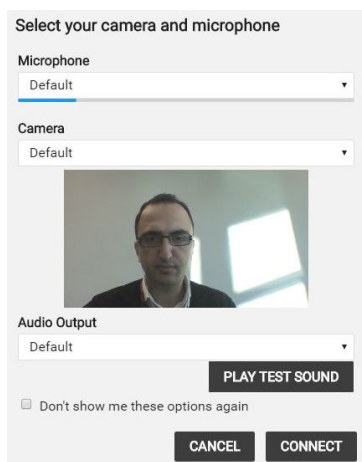

(!) In conversations with WebRTC, we recommend that you use the headset.

1. Surf to <https://teliavideomote.com/tvm/>
2. In the 'Individual or conference to dial', enter the alias for the virtual meeting room you wish to connect to.
3. Type your name in the 'Your Name'.
When you are connected to the conference, this name will appear in the roster left of the screen. (The roster shows the names of all participants)
4. If you want to change the connection speed for the call (for example, if you work remotely and have low bandwidth), click on 'Advanced' and select a suitable bandwidth.

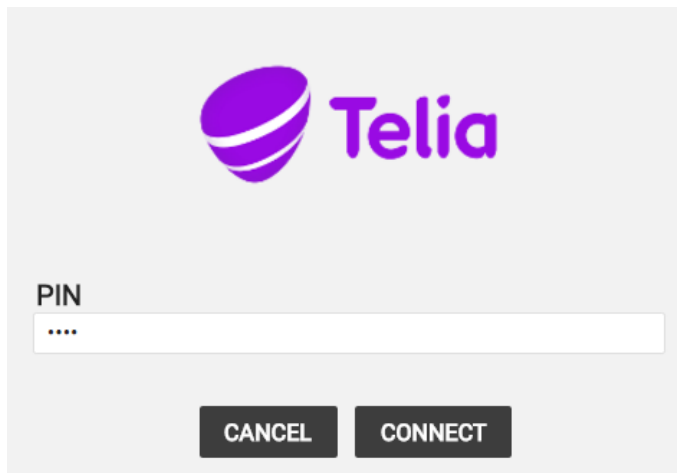

The screenshot shows the Telia WebRTC interface. At the top is the Telia logo. Below it is a form with two input fields: 'Conference alias or URI' containing '91xxxxx' and 'Your name' containing 'My-Name'. There are 'SETTINGS' and 'CONNECT' buttons at the bottom. A small icon of a headset is visible next to the 'CONNECT' button.

5. It may be that the computer will ask for permission to access your camera and microphone. You can also here have to choose which microphone and camera to use.

The screenshot shows a dialog box titled 'Select your camera and microphone'. It has three dropdown menus: 'Microphone' set to 'Default', 'Camera' set to 'Default', and 'Audio Output' set to 'Default'. There is a 'PLAY TEST SOUND' button and a checkbox for 'Don't show me these options again'. At the bottom are 'CANCEL' and 'CONNECT' buttons.

- If the virtual meeting room is PIN-protected you will be prompted to enter the code. Enter your host or guest code and click Join.

- After a while you will be connected to the conference.

View video image Full Screen	From the toolbar at the top of the window, you can enable or disable the full screen.	
+		
Turn on / off the microphone	From the toolbar at the top of the window, you can enable or disable the microphone.	
Turn on / off on camera	From the toolbar at the top of the window, you can enable or disable your camera.	
Turn on / off at his own image	From the toolbar at the top of the window, you can choose to show or hide your own image.	
View presentation	(!) Only available for Chrome From the toolbar at the top of the window, you can choose to share the presentation (desktop sharing)
